Volmpack

Weighers

M2 XXL

The Volmpack M2 XXL weigher is a great system for packaging lines between 10 and 100 pounds. By using three vibrating lanes of different widths per bucket, fast production speeds and accuracy are achieved. The vibrating lanes are capable of moving a large volume of product into the buckets. The final weight is handled by a one-lane discharge that can send to two sides of the weigher.

FEATURES

- Low cost, high-speed system
- Two large weighing buckets with capacities of up to 50 pounds
- Both weighing buckets equipped with three vibrating lanes
- User-friendly touchscreen
- All product contact points are either stainless steel or plastic
